

RANGER

Heavy Duty

SOLO

The Heavy Duty Solo is available in blue, red, or hunter green finish. (white shown)

The SOLO is one of the best combinations of strength, power, and maneuverability in a scooter- and now it is available for individuals up to 450 pounds!

The SOLO is only 45-1/2 inches long, and has a turning radius that makes it as maneuverable as most small scooters - so you don't have to sacrifice indoor operation to get a heavyweight scooter.

Ranger also offer a 4-wheel scooter in a heavy-duty model. The Solo IV Heavy Duty supports riders up to 450 pounds.

The Heavy Duty Extras include:

Deluxe Extra Large Seats- A comfortable, fully upholstered, contoured seat that is wider and deeper than most scooter seats, The standard SOLO armrests are adjustable to give you the width you need. (Minimum armrest width is 26 inches, so the arms are the widest part of the scooter.)

More Power- The Heavy Duty SOLO is equipped with added special gearing to give the rider approximately 20% more power than the already powerful SOLO Scooter.

Disassembly - You won't believe how easy it is. The frame separates in seconds with the pull of a handle.

Transportation - It goes where you go. It's easy to handle and loads within seconds. The heaviest piece weighs only 43 pounds.

Tiller adjustment - The control is at your finger tips, so there's no need to bend over and adjust the tiller angle. Four positive locking positions give you easy access and a comfortable ride.

Leg room - Plenty of leg room and a smooth floor make the SOLO easy to get on and gives you a comfortable ride.

Aluminum Frame - Aluminum gives the SOLO more strength with less weight... and no rust.

Easy to use - Fully variable speed control provides smooth starting and stopping. A dial control allows you to set your maximum speed. The electro-mechanical brake comes on automatically when you stop and releases automatically when you start. A key lock is provided for security.

Powerful - 24volt DC motor combined with rear wheel drive provides plenty of power to go where you want to go.

Transaxle drive - The Heavy Duty SOLO is available in an ultra quiet, fully enclosed, rubber mounted shock resistant transaxle drive assembly.

Disassembly in 3 Easy Steps

1. Remove the Seat

2. Remove Batteries

3. Pull "T" Handle

Ready for Loading
